OPERATIONS & OVERALL PERFORMANCE

The domestic steel industry has registered a consumption growth of about 8% during the year 2009-10 with consumption figures reaching to 56.3 million tonnes from 52.3 million tonnes in the previous year. The Industry is expected to achieve a substantial increase in crude steel production capacity by the year 2012. The steel prices started to show an increase from the second quarter of the year as the major steel companies raised their prices on back of steep rise in input costs. The increase in demand and increasing steel prices backed by robust demand from automobile and infrastructure sector helped the steel industry to record a good growth. MANAGEMENT DISCUSSION AND ANALYSIS

The core business of the Company is manufacturing and marketing Iron and Steel products and manufacturing capital equipments and turnkey projects. The Management discussions and analysis is given hereunder:-

- a) **Industry structure and development :** The steel Industry in India has successfully come out of the adverse effects of the global economic slowdown and registered a positive growth during the previous year. The National Steel Policy has fixed a target of taking steel production up to 110 MT by 2019–20. Nonetheless, with the current rate of ongoing green-field and brown-field projects, the Ministry of Steel has projected India's steel capacity to touch 124.06 MT by 2011–12. The Engineering Products of the Company has been approved for its engineering skills/works/services by various premier consulting companies and Inspection Agencies such as Engineers India Ltd, MECON, LRIS, BVIS, amongst various other agencies. The Division has further been approved by Industrial Boiler Regulatory Authority (IBR). The Engineering segment is highly competitive in view of tough competition from foreign companies / agencies and giant public / private sector undertakings. The development of engineering industry depends on the development of core sectors and the infrastructure sector.
- b) **Opportunities and threats:** The Indian steel Industry witnessed an upward trend during the previous year. It has huge scopes in the future with massive scale of infrastructural development happening all across the country. This upward trend is expected to be continued on account of favourable conditions like competitive prices, increase in consumption of steel owing to upcoming infrastructure and Greenfield projects, highly skilled and low cost workforce etc. The major threats for the industry is higher cost of inputs and lower realizations which may put pressure on the profitability and operating margins of the international as well as domestic steel companies. In addition to this, major obstacles are current economic turmoil, technological change, inadequate availability of suitable quality of raw material, increasing prices of raw materials, high cost of energy / capital etc.
- c) **Segment-wise performance:** The Company is mainly in the business of manufacturing Steel and Capital Equipments and Turnkey Projects. The Company has no activity outside India except export of steel products manufactured in India. Segment wise performance is given at Note No. 25 of Schedule P i.e. Notes on Accounts.
- d) **Outlook:** The outlook for the industry looks reasonable, since India has good iron ore deposits, skilled manpower and growing demand for steel. The Indian steel industry has made a rapid progress on strong fundamentals over the recent few years. The industry is getting all essential ingredients required for dynamic growth. The government is backing the industry through favorable industrial reforms, while the private sector is supporting it with investments worth billions of Rupees. Even in the tough times of economic slowdown, the industry succeeded to sustain its positive growth momentum on the strong fundamentals of domestic demand from construction, automobile and infrastructure sectors. With an impressive track record, the country has become a reputed name in the world steel industry. Global steel giants from all over the world have shown interest in the industry because of its phenomenal performance. The Company continues to compete and participate in the tenders of various Public and Private Sector giants and is hopeful of bagging considerable fresh orders for engineering products.
- e) **Risk and concerns:** The domestic steel industry carrying inherent risk in respect of imbalance in supply / demand apart from price sensitivity and demand volatility. Slowdown in implementation of the Greenfield Steel projects by major steel producers due to non-availability of sufficient iron ore, coal and land, may increase the prevailing supply demand gap in coming years. Besides the above, the global market turmoil, which dented the growth curve of user industry, may affect the progress of the steel industry. The company has been taking continuous modernization programme to maintain efficient operation of its Steel and Engineering activities.
- f) **Internal control system:** The Company maintains periodical internal checks and conduct adequate internal audit, which provide safeguards and proper monitoring and vetting of transactions. ISO-9001:2000 certification has been obtained for execution of works at Murbad. Necessary quality control systems and procedures have been established. Periodical internal checks and audits are conducted by the Management and Internal Auditors. Upgradation wherever necessary are carried out at frequent intervals.
- g) **Discussion on financial performance with respect to operating performance:** The operating performance of the Company has been discussed in Directors Report under the head 'Financial Highlights' & 'Operations and Overall Performance' in the current year.
- h) **Human resources and industrial relations:** During the year under review the Employee/Industrial relations at all units and job sites remained cordial. Training programmes are conducted internally for staff and workmen. Training is imparted for updating of manufacturing techniques/processes. Personnel are sponsored for external programmes on need based.. Number of employees as on 31st March, 2010 was **1438**.
- i) **Cautionary Statement:** The Management Discussions and Analysis describe Company's projections, expectations or predictions and are forward looking statements' within the meaning of applicable laws and regulations. Actual results could differ materially from those expressed or implied.
